PROFESSIONAL SUMMARY

Final-year Computer Science (AI/ML) student with hands-on experience in Python, TensorFlow, and computer vision, having built 4+ end-to-end ML and full-stack projects including a real-time face recognition system and a customer churn prediction platform. Solved 530+ DSA problems on LeetCode and GeeksforGeeks. Seeking an AI/ML Engineer Intern role to apply machine learning, data analysis, and model development skills to real-world problems.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, C/C++

Machine Learning: Supervised & Unsupervised Learning, Regression, Classification, Clustering, Feature Engineering, Model Evaluation, Data Preprocessing

AI / Deep Learning: Neural Networks, Deep Learning, NLP, Computer Vision, Generative AI

Web Technologies: HTML, CSS, JavaScript, React.js, Node.js

Libraries & Frameworks: NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, TensorFlow, PyTorch, OpenCV

Databases: MySQL, MongoDB, PostgreSQL

Dev Tools: Git, GitHub, VS Code, Postman, Jenkins, Docker, Kubernetes

Other: REST APIs, JSON, OOP, Data Structures & Algorithms

PROJECTS

FaceMark-AI — Automated Attendance System

Python, OpenCV, Face Recognition, CustomTkinter, MySQL

- Built an AI-based attendance system with real-time webcam face recognition, automated marking, and duplicate prevention, using face encodings and face-distance comparison for identification.
- Integrated a MySQL database for student and attendance record management, with a dashboard for tracking records.

ShadowAI — AI-Powered Voice Assistant

Python, Speech Recognition, Gemini API, News API

- Developed a voice-controlled assistant with wake-word detection, natural language interaction, and web automation for app launching, navigation, and music playback.
- Integrated Google Gemini API and News API for conversational responses and real-time news retrieval, using a modular architecture for extensibility.

Customer Churn Prediction & Business Insight System

Python, Pandas, Scikit-learn, Matplotlib, Seaborn

- Built a machine learning pipeline to predict customer churn and segment at-risk customers, including data preprocessing and exploratory data analysis.
- Created interactive dashboards and visualizations delivering actionable business insights for customer retention strategy.

Portfolio Website

HTML, CSS, JavaScript

- Designed and deployed a responsive personal portfolio website on Netlify showcasing projects, skills, and experience.

EDUCATION

Bachelor of Technology in Computer Science (AI/ML)

2024 – 2028

D Y Patil Agriculture & Technical University, Talsande, Kolhapur | CGPA: 8.5 / 10.0

CERTIFICATIONS

AWS Cloud Practitioner Essentials (AWS) | JavaScript IT Specialist (Certiport) | Software Foundation Course – C++ (IBMCE) | Python (IBMCE) | AI-Data Engineering Analyst (NASSCOM) | AI-Machine Learning Engineer (Reliance Foundation)

ACHIEVEMENTS

- Solved 150 DSA problems on NeetCode.
- Achieved a 5-star rating in SQL and Python on HackerRank.

COURSES

Data Structures & Algorithms — Udemy | Web Development Bootcamp — Udemy | Java Full Stack Development — CodeWithHarry

LANGUAGES

English — Professional Working Proficiency
